Bulletin 2341

For sale by the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402

Preface

The data contained in this bulletin represent the complete count of employment and wages for workers covered by unemployment insurance programs during 1988 in the 50 States and the District of Columbia. State employment security agencies assemble these data from reports filed by employers and edit, process, and analyze them by industry. The Bureau of Labor Statistics further compiles these data on a national basis, by State, and by industry.

This bulletin was prepared in the Office of Employment and Unemployment Statistics under the direction of Brian MacDonald, Chief of the Division of Occupational and Administrative Statistics. Joseph Bush, Darrell E. Carr, and Michael Cimini assisted in the preparation of this bulletin. Data verification was performed by Mary Bowler, Louise Campbell, Robert J. Malin, Roberto Morales, Muriel Nelson, Bradley Schwartz, and Linda Unger. Data were prepared and processed by Barbara Athey, Sherman Barnett, Robert Woodson, Leslie Limmer, Sandra Hall, Rex Tharp, and Jerry Trach in the Division of Business Establishment Systems, Robert Carlson, Chief. The tables were photocomposed and developed through the Table Producing Language (TPL) System.

Material in this publication is in the public domain and, with appropriate credit, may be reproduced without permission.

How to obtain publications and data 527

BLS regional offices and cooperating State agencies (inside back cover)

Introduction

This publication presents 1988 annual data on employment and wages based on the 1987 *Standard Industrial Classification (SIC) Manual*. The data relate to workers covered by unemployment insurance (UI) laws and Federal civilian workers covered by the Unemployment Compensation for Federal Employees (UCFE) program. The data for both private and public workers are reported to BLS by the employment security agencies of the 50 States and the District of Columbia as part of the Covered Employment and Wages program (i.e., the ES-202 report).

Reports under this program are also received from the employment security agencies in Puerto Rico and the Virgin Islands, but their data are excluded from this bulletin. Prior to 1984, publications in this series included data for Puerto Rico and the Virgin Islands. For comparability, historical data in table 1 were adjusted to exclude these areas.

For 1988, employers in private industry provided State employment security agencies with quarterly tax reports on monthly employment and quarterly total and taxable wages and contributions for an average of 87.4 million wage and salary workers in approximately 5.6 million reporting units. Similar reports on monthly employment and quarterly wages were submitted by the Federal Government for 3.1 million civilian employees, by State governments for 3.7 million employees, and by local governments for 10 million employees. These reports cover over 99 percent of total wage and salary civilian employment and provide a virtual census of employees and their wages for nearly all sectors of the economy. The principal exclusions from UI and UCFE coverage are cited in the appendix, "Characteristics and Uses of the Data," which follows the tabulations.

Data presented in the tabulations are by industry, State, and ownership, and include the average number of reporting units, annual average employment, total wages, and annual and average weekly wages per employee. National employment and wage totals are published for 11 broad industry divisions, 84 major industry groups, and almost all of the 1,005 4-digit SIC industries. Private sector data are presented by State for the divisions and 4-digit SIC industries. State, local, and Federal Government data are presented for selected industries.

Because the 1988 data are coded to the 1987 SIC manual and the 1987 data (Bulletin 2314) were coded to the 1972 manual, comparisons between numerous industries, especially at the 4-digit level, cannot be made. Therefore, year-to-year percent changes, which are usually displayed in table 2, are excluded from this publication.

Highlights of the SIC revision process and first quarter 1988 ES-202 data classified in accordance with the 1987 SIC manual were published in *Employment Data Under the New Standard Industrial Classification, First Quarter 1988*, BLS Report 772, September 1989.

Table 1. Total coverage (UI and UCFE) by ownership: Reporting units, employment, and wages, annual averages 1979-88

Year	Average reporting units	Annual average employment	Total annual wages (in thousands)	Annual wages per employee	Average weekly wage
	Total covered (UI and UCFE)[1]				
1979	4,608,042	88,826,000	$1,168,498,310	$13,155	$253

---

[1] Includes data for nonclassifiable establishments (SIC 9999), not shown separately.

[2] Includes data for 4-digit industries not shown separately. This exception to 4-digit industry data is made because adequate respondent records are not available on a uniform basis.

[3] Most railroad employees are covered by unemployment programs under the Railroad Retirement Act and thus not included in this bulletin.

[4] Includes data for international or foreign government ownership, not shown separately.

[n] Indicates data do not meet BLS or State agency disclosure standards.

nec = not elsewhere classified.

NOTE: Detail may not add to totals because of rounding.

Table 3. Total coverage (UI and UCFE) by State, 1988 annual averages: Reporting units, employment, and wages, change from 1987

---

[1] Includes data for nonclassifiable establishments (SIC 9999), not shown separately.

[2] Includes data for 4-digit industries not shown separately. This exception to 4-digit industry data is made because adequate respondent records are not available on a uniform basis.

[3] Most railroad employees are covered by unemployment programs under the Railroad Retirement Act and thus not included in this bulletin.

[n] Indicates data do not meet BLS or State agency disclosure standards.

nec = not elsewhere classified.

Dash = zero reporting units, employment, or wages.

NOTE: Detail may not add to totals because of rounding.

Table 6. State government by State and selected industries: Reporting units, employment, and wages, 1988 annual averages

[n] Indicates data do not meet BLS or State agency disclosure standards.

Dash = zero reporting units, employment, or wages.

NOTE: Detail may not add to totals because of rounding.

[n] Indicates data do not meet BLS or State agency disclosure standards.

Dash = zero reporting units, employment, or wages.

NOTE: Detail may not add to totals because of rounding.

Table 8. Federal Government by State and selected industries: Reporting units, employment, and wages, 1988 annual averages

[1] Includes reporting units that reported no workers in March 1988.

[2] Includes data for nonclassifiable establishments, not shown separately.

Appendix. Characteristics and Uses of the Data

Characteristics

The statistics in this publication are compiled for the Covered Employment and Wages program from the quarterly tax reports submitted to State employment security agencies by employers subject to State unemployment insurance (UI) laws and Federal agencies subject to the Unemployment Compensation for Federal Employees (UCFE) program. Each quarter, the State agencies edit, process, and analyze the data and send the ES-202 report to the Bureau of Labor Statistics in Washington.

Unemployment insurance laws and coverage

Initially, the Federal Unemployment Insurance Tax Act (1938) applied only to firms employing at least eight persons for a minimum of 20 weeks in a calendar year and excluded certain categories of workers. Amendments to Title XV of the Social Security Act—the program of Unemployment Compensation for Federal Employees—extended coverage to Federal civilian employees effective January 1, 1955, and to workers in firms employing from four to seven workers effective January 1, 1956.

Federal legislation, effective January 1, 1972, extended coverage of State unemployment insurance systems in 28 States to firms employing one or more workers and expanded some of the statutory coverage provisions. The remaining States had previously extended coverage to these small employers. The 1972 legislation also brought coverage to employees of State hospitals, colleges, and universities.

The Federal Unemployment Compensation Amendments of 1976 incorporated major changes in State unemployment insurance laws effective January 1, 1978. Under the Federal Unemployment Tax Act (FUTA), States expanded coverage to include nearly all remaining State and local government employees, employees of nonprofit elementary and secondary schools, and many agricultural and domestic workers. Some States began implementing the amendments as early as 1976. The law also brought the Virgin Islands under the UI system.

Under a 1981 Supreme Court ruling, church-chartered schools are not required to be covered under the UI system. However, many of these schools continue to cover their employees on a voluntary basis. Special provisions for railroad workers are made through the Railroad Unemployment Insurance Act. Data reported for the Unemployment Compensation for Ex-servicemen (UCX) and Railroad Retirement Board programs are excluded from the tables in this publication.

Over the years, many States have legislated unemployment insurance protection for additional categories of workers above the base established through Federal legislation. Details on coverage laws are provided in *Comparison of State Unemployment Insurance Laws*, available upon request from the Employment and Training Administration of the Department of Labor.

Comparisons between one State and another should take into consideration the differences in laws between States. When UI-covered private industry employment data are compared directly with other employment series, the industry exclusions also should be taken into account. Excluded from private sector coverage in 1988 were approximately 0.2 million wage and salary agricultural employees, 1.4 million self-employed farmers, 8.5 million self-employed nonagricultural workers, 0.9 million domestic workers, and 0.4 million unpaid family workers. Also excluded from industry detail tables in this publication were 1.7 million members of the Armed Forces stationed in the United States, and about 0.3 million workers covered by the railroad unemployment insurance system. Not covered by UI laws were about 0.6 million State and local government workers. In addition, certain types of nonprofit employers, e.g., religious organizations, are given a choice of coverage or noncoverage in a number of States.

UI/UCFE covered employment

In general, ES-202 covered employment data represent the number of workers earning wages during the pay period including the 12th day of the month. The pay period varies, but intervals common to many employers are 7 and 14 days; other employers pay on a semimonthly or monthly basis. An employer who pays on more than one basis (such as production employees weekly and office employees biweekly) reports the sum of the number of workers on each type of payroll for the appropriate period.

Workers are reported in the State where their jobs are physically located. Covered private industry employment includes most corporate officials, executives, supervisory personnel, professionals, clerical workers, wage earners, piece workers, and part-time workers. It excludes proprietors, the self-employed, unpaid family members, and certain farm and domestic workers.

Persons on paid sick leave, paid holiday, paid vacation, etc., are included. Persons on the payroll of more than one firm during the period are counted each time they are reported. Workers are counted even though, in the latter months of the year, their wages may not be subject to the unemployment insurance tax. The employment count excludes workers who earned no wages during the entire applicable pay period because of work stoppages, temporary layoffs, illness, or unpaid vacations.

Employment data reported for Federal civilian employees are a byproduct of the operations of State employment security agencies in administering the provisions of Title XV of the Social Security Act—the program of Unemployment Compensation for Federal Employees. These data are based on reports of monthly employment and quarterly wages submitted each quarter to State agencies for all installations of Federal agencies having employees covered by the act, except for certain national security agencies, which are omitted for security reasons.

Employment for any given month for all Federal agencies, except the Department of Defense, is based on the number of persons on the payroll for the pay period including the 12th of the month. Installations of the Department of Defense include persons employed on the last workday of the month plus all intermittent employees—occasional workers who were employed at any time during the month.

Reporting units and employment size

Reporting units are, for the most part, individual establishments. An establishment generally is defined as a single physical location at which one, or predominantly one, type of economic activity is carried on. Most employers covered under the State UI laws operate only one place of business. Multiunit employers having establishments in more than one county, or classifiable in more than one 4-digit SIC industry, are requested to submit a separate report for each county and industry. Employers having a total of fewer than 50 employees in all secondary counties or industries, however, may combine these units with the primary county or industry report.

In the Federal Government, the equivalent of a reporting unit is an installation (a single physical location) and the equivalent of an employer or firm is the organization of which the installation is a part, i.e., the department, agency, or instrumentality responsible for an activity of government. The Federal agencies currently report data separately by installation. This type of reporting permits the grouping of the data by political subdivisions below the State level, i.e., county, metropolitan area, etc. However, a few agencies with scattered offices within States submit statewide reports, as permitted by UCFE regulations of the Secretary of Labor.

First-quarter ES-202 reports for 1988 tabulate reporting units into size categories ranging from units of very small size to those with 1,000 employees or more (table 9). The size-of-unit data are valuable for certain analyses, as, for example, in determining the proportion of new jobs attributable to small businesses.

Wages

Total wages. Covered employers in most States report total compensation paid during the calendar quarter, regardless of when the services were performed. A few State laws, however, specify that wages be reported or based on when services are performed rather than when compensation is paid. Under most State laws or regulations, wages include bonuses, the cash value of meals and lodging, tips and other gratuities, and, beginning in 1986, employer contributions to certain deferred compensation plans such as 401(k) plans in a majority of States.

Covered employer contributions for old-age, survivors, disability, and health insurance (OASDHI), unemployment insurance, workers' compensation, and private pension and welfare funds are not reported as wages. On the other hand, employee contributions for the same purposes, as well as money withheld for income taxes, union dues, etc., are reported even though they are deducted from the worker's gross pay.

Wages of covered Federal workers represent the gross amount of all payrolls for all pay periods ending within the quarter. This includes cash allowances, the cash equivalent of any type of remuneration, severance pay, withholding taxes, and retirement deductions. Federal employee remuneration generally covers the same types of services as for workers in private industry. Depending on the method used by the Federal agency in preparing its quarterly summary balance (cash or accrual basis), the gross amount of payrolls is either paid or payable.

Average wages. Average annual wages per employee for any given industry are computed by dividing total annual wages by annual average employment. A further division by 52 yields average weekly wages per employee. Because of rounding, annual wages per employee and average weekly wages, computed from other data presented in the tables, may differ from the average data shown in the tables, which were computed from the unrounded figures. Annual pay data only approximate annual earnings because an individual may not be employed by the same employer all year or may work for more than one employer.

Average weekly or annual pay is affected by the ratio of full-time to part-time workers as well as the number of individuals in high-paying and low-paying occupations. When comparing average pay levels between States and industries, these factors should be taken into consideration. For example, industries characterized by high proportions of part-time workers will show average wage levels appreciably below the weekly earnings levels of regular full-time employees in these industries. The opposite effect characterizes industries with low proportions of part-time workers, or industries which typically schedule heavy weekend and overtime work. Average wage data also may be influenced by work stoppages, labor turnover, retroactive payments, seasonal factors, bonus payments, etc.

Industrial classification

Employment and wage data under the ES-202 Program have been classified by industry since 1938. Industrial codes are assigned by State agencies to each reporting unit based on responses to questionnaires where employers indicate their principal product or activity. If a private or government employer conducts different activities at various establishments or installations, separate industrial codes are assigned, to the extent possible, to each establishment.

The 1988 data presented in this report are classified in accordance with the 1987 *Standard Industrial Classification Manual*. The manual provides for 1,005 4-digit industries, 416 3-digit industries, 84 major industry groups, and 11 industry divisions. Of the 1,005 4-digit industries, 29 are not utilized in the coding of data because of problems in accurately classifying the industry of some employers.

Because the 1988 data are coded to the 1987 SIC manual and the 1987 data (Bulletin 2314) were coded to the 1972 manual, comparisons between numerous industries, especially at the 4-digit level, cannot be made. Therefore, year-to-year percent changes, which are usually displayed in table 2, are excluded from this publication.

Highlights of the SIC revision process and first quarter 1988 ES-202 data classified in accordance with the 1987 SIC manual were published in *Employment Data Under the New Standard Industrial Classification, First Quarter 1988*, BLS Report 772, September 1989.

Disclosure restrictions

In accordance with BLS policy, data provided to the Bureau in confidence are not published and are used only for specified statistical purposes. BLS withholds publication of UI covered employment and wage data for any industry level: (1) which consists of fewer than three reporting units; or (2) in which a single unit accounts for 80 percent or more of the industry's employment. A State also may request that data be withheld for any industry level for which the above criteria would not protect the identity of cooperating employers. Totals at the industry level for the States and the Nation include the nondisclosable data suppressed within the detailed tables. However, these totals cannot be used to reveal the suppressed data.

Estimated data

To reduce the effect of data excluded because of late reporting by covered private and government employers, State agencies estimate employment and wages for such employers and include them in each quarterly report. Corrections to data which may be entered after a report is filed will include replacement of estimates with reported data to the extent available. Estimates are prepared for the individual reporting unit based on data reported for the preceding quarter and trends in employment reported by employers and installations in the same industry. Information obtained from other sources also is used. If an account remains delinquent for more than one quarter, and research shows that it is still active, the reporting unit will again be estimated.

Comparison of ES-202 covered employment data with other series

Current Employment Statistics program. The BLS and State employment security agencies cooperate in the operation of the Current Employment Statistics (CES) program. In this program, the State agencies are responsible for preparing current employment estimates for the States and for many major labor market areas in the States, while the BLS is responsible for monthly national estimates. The current CES estimates of employment, average weekly and hourly earnings, and average weekly hours are derived from payroll reports from a sample of over 300,000 establishments. The national and State industry estimates are benchmarked annually to the ES-202 covered employment data supplemented by other employment data obtained from other sources.

Current Population Survey. The Current Population Survey (CPS) is based on a sample of about 55,800 households, whereas the ES-202 series is based on a universe of over 5.8 million employer reporting units. The CPS counts employed persons, whereas the ES-202 program counts encumbered jobs during the reporting period. Consequently, the CPS includes those persons "with a job but not at work" who earn no wages—for example, workers on extended unpaid leave of absence. The ES-202 data, on the other hand, exclude unpaid workers. The ES-202 covered employment data count separately each job held by multiple jobholders. The CPS, however, counts such workers once, only in the job at which they worked the greatest number of hours. The CPS counts people at their place of residence; the ES-202 program counts jobs at the place of work. The CPS differs from the ES-202 program in that it includes self-employed persons, unpaid family workers employed 15 hours or more during the survey period, and a greater proportion of agricultural and domestic workers. The CPS data exclude persons under 16 years old, while the ES-202 program counts all covered workers regardless of age.

Office of Personnel Management data. The Office of Personnel Management (OPM) publishes a statistical series on Federal employment and payrolls with information on employing agencies, types of positions and appointments, and characteristics of employees. Data on Federal employment covered by the UCFE series provide industry, local area, and monthly employment detail not available in the OPM series. These detailed UCFE data are not published, but are available from the Bureau of Labor Statistics upon request.

Both the UCFE and the OPM data exclude members of the Armed Forces, temporary emergency workers employed to cope with catastrophes, and officers and crew members of some American vessels. The UCFE and the OPM data also differ in other inclusions and exclusions. For example, the UCFE, but not the OPM, includes Department of Defense workers paid from nonappropriated funds, employees of county agricultural stabilization and conservation committees, State and area marketing committees, and the Agricultural Extension Service. The OPM, but not the UCFE, includes workers who are not U.S. citizens and who are employed outside the United States and its territories; workers paid on a contract or fee basis; paid patients or inmates of Federal homes, hospitals, or institutions; and student employees of Federal hospitals, clinics, and laboratories. UCFE employment data relate to the payroll period including the 12th of the month while the OPM data relate to persons employed on the last workday of the month plus all intermittent employees.

County Business Patterns. Covered employment data collected through the ES-202 report differ from employment data as published in *County Business Patterns* (CBP) in the following major areas: (1) CBP data exclude administrative and auxiliary units from "operating" unit data at the 4-digit level and include these data at the industry division level only.

ES-202 covered employment, on the other hand, includes data for these units at the 4-digit SIC level; (2) CBP excludes agricultural production workers and household workers, some of whom are included in ES-202 covered employment data. CBP also excludes government units, all of which are included in ES-202 covered employment; (3) every 5 years, data are collected for all multiunits within the scope of business and economic censuses and included in the CBP for that year. Annual updates for multiunits are obtained from the sample selected for the Company Organization Survey, and data for nonsample multiunits are estimated. Annual updates for single units come from the Internal Revenue Service and the Social Security Administration. ES-202 covered employment, on the other hand, includes data collected from all active units each quarter.

Uses of the Data

The covered employment and wage data (ES-202 series) are the most complete universe of monthly employment and quarterly wage information by industry at the national, State, and county levels. They have broad economic significance in evaluating labor market trends and major industry developments, in time series analyses and industry comparisons, and in special studies such as analyses of wages by size of employer.

The program provides data necessary to both the Employment and Training Administration of the U.S. Department of Labor and the State employment security agencies to administer the employment security program. These data accurately reflect the extent of coverage of the State unemployment laws and are used to measure UI revenues and disbursements; national, State, and local area employment; and total and taxable wage trends. The information allows actuarial studies, determination of experience ratings, maximum benefit levels, and areas needing Federal assistance, and also helps ensure the solvency of the unemployment insurance trust funds. The ES-202 data are used to compute State unemployment rates for workers covered by UI programs, and national averages of these rates.

The ES-202 data are also used in a variety of BLS programs. They serve, for example, as the basic source of benchmark information for employment by industry and by size of unit in the Current Employment Statistics program (BLS-790). The Unemployment Insurance Address File, developed in conjunction with the ES-202 report, serves as a national sampling frame for BLS establishment surveys such as the Industry Wage Surveys, Area Wage Surveys, Occupational Employment Statistics Surveys, and several other establishment-based programs.

Additionally, the Bureau of Economic Analysis of the Department of Commerce uses ES-202 data as a base for developing a large part of the wage and salary component of the National Income and Product Accounts. A subdivision of these accounts, personal income, is instrumental in determining Federal allocation of revenue-sharing funds to State and local governments.

The ES-202 data are used by businesses and by public and private research organizations as one of the best sources of detailed employment and wage statistics for economic forecasting and other uses. State governments often use the data in econometric models to project income tax revenues as well as industry and occupational employment.

How to Obtain Publications and Data

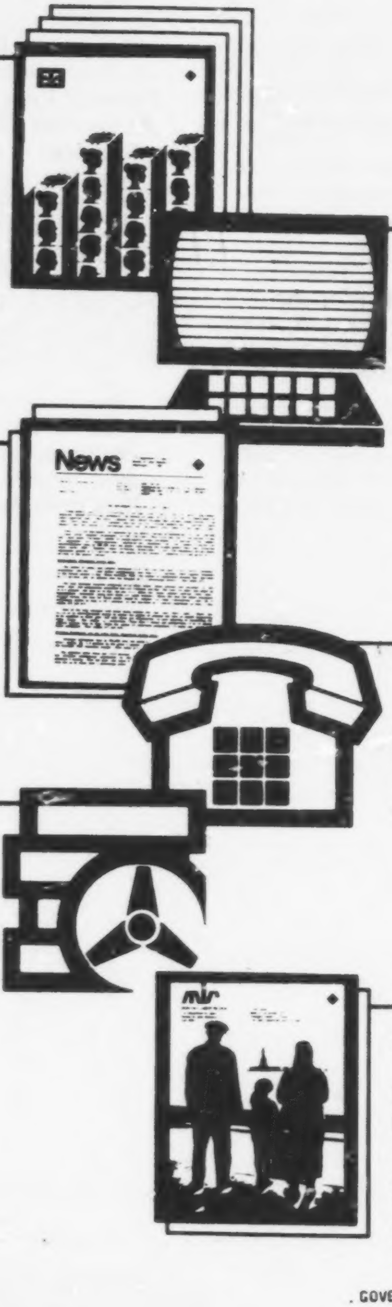
Prior editions of *Employment and Wages* are out of print, but file copies may be examined at the BLS Washington office. The publications for 1975 through 1982 are available on microfiche from the National Technical Information Service, U.S. Department of Commerce, 5285 Port Royal Road, Springfield, VA 22151. You may call (703) 487-4600 for information. When ordering, please mention the pertinent NTIS microfiche number as follows:

Employment and Wages	*NTIS microfiche number*
1975	PB83151316
1976	PB81146029
1977	PB81146037
1978	PB82106964
1979	PB83151324
1980	PB84121607
1981	PB84121615
1982	PB84172600

County-level and historical machine-readable data are available from the BLS Washington office. The charge for this service varies according to the complexity and volume of the request. Please request data by mail from the Office of Federal-State Programs, U.S. Department of Labor, Bureau of Labor Statistics, Washington, DC 20212. Include the name and telephone number of an individual the Bureau may contact if necessary.

Most State agencies have ES-202 covered employment and wage data for both the private and government sectors by county and for important local labor market areas. Requests for these detailed data should be made directly to State agencies (listed on the inside back cover of this publication). Data for Puerto Rico and the Virgin Islands are also available and may be obtained from BLS Washington or the employment security agency in those areas.

Where to Find Information on Employment and Unemployment



Employment and Earnings:

Monthly periodical containing labor force and establishment data. National, State, and area figures on employment, unemployment, hours, and earnings. Order *Employment and Earnings* from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Includes text, statistical tables, and technical notes.

Electronic News Release:

Quickest. Accessible electronically immediately at release time through BLS news release service. Write the Office of Publications, Bureau of Labor Statistics, Washington, D.C. 20212, or call (202) 523-1913.

Employment Situation News Release:

Copies of this national statistical monthly release reach the public about a week after the release date. Write: Inquiries and Correspondence, Bureau of Labor Statistics, Washington, D.C. 20212.

Telephone:

Quick summary on 24-hour recorded message. Key numbers, plus other BLS indicators and upcoming release dates. Call (202) 523-9658.

Machine-Readable Form:

Labor force data from the household survey and employment, hours, and earnings data from the establishment survey are available on both computer tape and diskette. For information, write the Office of Publications, Bureau of Labor Statistics, Washington, D.C. 20212 or call (202) 523-1090.

Monthly Labor Review:

Employment and unemployment statistics included in monthly 47-page summary of BLS data and in analytical articles. Available from the Superintendent of Documents, U.S. Government Printing Office Washington, D.C. 20402.
